DETAILED ACTION

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985) *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-45 are provisionally rejected under the judicially created doctrine of double patenting over claims of copending Application No.09/072,549. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

Claim 1 of Application 09/072,549 recites:

Claim 1 of ^{09/072,549} 08/877,082 ^{5c}	Claim 1 of present application
a video communication system	A videoconferencing system
comprising:	comprising:
a) at least one analog video-	a) at least one video signal
signal source;	source;
b) at least one video display	b) at least one video display
device;	device;
c) at least one control	d) at least one processor ...
communication component ...	
d) an unshielded twisted pair of	c) at least one unshielded
wires defining a UTP	twisted pair of wires ...
communication path, arranged for	
video-signal transportation.	

The same rationale for double patenting applies to other claims.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claims 1-45 are rejected under the judicially created doctrine of obviousness double patenting over claims of U.S. patent No. 5,617,539.

The patent 5,617,539 claimed essentially all limitations of the present application except for the limitation of the video path being a UTP path. The UPT path is fully disclosed in the patent 5,617,539.
